

[illegible]

A green circular printed circuit board (PCB) is shown, densely populated with numerous silver-colored solder points or components. The board is labeled with the text 'E199273' and 'GY-T35' in white. A black cable is connected to the board, and a small black component, possibly a battery or a small electronic module, is attached to the bottom of the board. The entire assembly is set against a solid green background.

Top View of PCB (13W/ELS-M & 13W/ELS-M/50K)
